# 400W-1200W

# **Medical Power Supply**

Low Acoustic Noise 1U size

# 

### PLUG & PLAY POWER next generation power solution

### **FEATURES & OPTIONS**

- Low Acoustic noise 42.7dBA
- EN60601-1 3rd edition Approved
- · Less than 300µA leakage current
- 150µA option available
- 4000VAC isolation
- Ultra high efficiency, up to 89%
- Extra low profile: 1U height (40mm)
- Plug & Play Power allows fast custom configuration
- · Individual output control signals
- All outputs fully floating
- Series / Parallel of multiple outputs
- Few electrolytic capacitors (all long life)
- 5V bias standby voltage provided
- Standard Xgen product options include: Conformal Coating, Low Acoustic Noise, Low Leakage Current, Extra Ruggedisation, Connector, Cabling & Mounting options, Thermal Signals and Reverse Fans. See Section 4.10 for more information

# **APPLICATIONS INCLUDE**

- · Clinical diagnostic equipment
- Medical lasers
- · Dialysis equipment

#### Note: See diagrams on pages 34-37

The XZ family of low acoustic noise medically approved power supplies provides

up to 1200W in an extremely compact 1U x 260mm x 127mm package. Boasting

industry leading power density of 15W/in<sup>3</sup> and efficiencies of up to 90%, the XZ family employs an innovative plug & play architecture that allows users to

Ideal for acoustic sensitive medical applications the XZ family provides unmatched efficiency

and high power density, made possible through the combination of low loss technologies and

The XZ family consists of 3 powerPac models ranging in power levels from 400W to

1200W. Each model may be populated with up to 6 powerMods selected from the

All configurations carry full safety agency approvals, UL60601-1, EN60601-1 3rd Edition and

the best field-proven technologies in planar magnetics and surface mount electronics.

instantly configure a custom power solution in less than 5 minutes!

#### **EFFICIENCY** (typical)

# 400W-1200W

**Medical Low Acoustic Noise** 

#### SPECIFICATION applies to configured units consisting of powerMods plugged into the appropriate powerPac

**S** 1. This product is not intended for use as a stand alone unit and must be installed by qualified personnel.

2. The specifications contained herein are believed to be correct at time of publication and are subject to change without notice.

3. All specifications at nominal input, full load, 25°C unless otherwise stated.

4. See Xgen Designers Manual for detailed power ratings.

5. When powering inductive or capacitive loads, it is recommended to use a blocking diode on the output.

6. For section references above go to the Xgen Designers Manual.

# Xgen Flexibility and Signals

For detailed information please refer to the Xgen Designers' Manual which is available on-line or contact Excelsys.

#### Voltage Adjustment

Output voltage can be adjusted in a number of ways:

- On board multi turn potentiometer 1.
- Remote resistive programming (via Vtrim pin) 2
- Remote voltage programming (via Vtrim pin) 3

#### **Current Limit Adjustment**

Output current limit can be Straight line or Foldback and can be adjusted via Itrim pin.

#### **Parallel Connection**

To achieve increased current capacity, simply parallel outputs using the standard parallel links.

Parallel Links available to order. Part Number XP1

#### **Series Connection**

To achieve increased output voltages, simply series outputs using standard series links, paying attention to the requirements to maintain SELV levels if required in your system.

Series Links available. Part Number XS1

#### **Remote Sensing**

When the load is remote from the power supply, the remote sense pins may be used to compensate for drops in the power leads. Where the power cabling contributes significant dynamic impedance, see Xgen series Designers' Manual.

#### **Bias Voltage**

A SELV isolated bias (always on) voltage of 5V @ 250mA (30mA on XCE and XVE models) is provided on J2 pin 2 relative to J2 pin 1 (common) and may be used for miscellaneous control functions. 5V @ 500mA available on request.

#### Inhibit/Enable

Inhibiting may be implemented either globally or on a per module basis (powerPac or powerMod inhibiting). Reverse logic (enabling) may also be implemented.

#### AC Fail

Open collector signal indicating that the input voltage has failed or is less thant 80Vac. This signal changes state giving 5ms of warning beore loss of output regulation.

#### **Power Good**

Opto-isolated output signal indicates that the powerMod is operating correctly and output voltage is within normal band.

### powerPac Options

#### **Temperature Alarm (Option 01)**

Open collector signal indicating that excessive temperature has been reached due to fan failure or operation beyond ratings. This signal is activated at least 10ms prior to system shutdown.

#### Fan Fail (Option 01)

Open collector signal indicating that at least one of the powerPac fans has failed. This does not cause power supply shutdown. The power supply will continue to operate until 10ms after the temperature alarm signal is generated.

#### **Reverse Fan (Option 02)**

The Xgen series is available with reverse air flow direction. Contact Excelsys for derating details.

#### Ultra Low Leakage current (Option 04)

The Xgen is available with the option of Ultra Low Earth Leakage Current of <150µA and is approved to EN60601-1 and UL60601-1 2nd and 3rd Editions.

#### **Conformal Coating (Option C)**

Xgen is available with conformal coating for harsh environments and MIL-COTs applications.

#### Ruggedised Option (Option R)

Xgen is available with extra ruggedisation for applications that are subject to extremes in shock and vibration.

#### Input cable Option (Option D)

3 Wire input mains cable. Input cables are 300mm in length and come supplied with fast on connectors.

#### **Signal Connector Pinout**

# **Xgen Product Selector**

The Xgen series of user configurable power supplies with its unique plug and play architecture allows system designers to define and build 'instant' custom power solutions with industry leading 17W/in<sup>3</sup> power density and up to 90% efficiency.

## Xgen powerPacs

The application specific 4 slot and 6 slot *powerPacs* provide up to 12 isolated DC outputs from 200W up to 1340W. The table below summarises the *powerPacs* by application and power level. Please refer to the specific product datasheets for full specifications.

Application	Slots	200W	400W	600W	700W	750W	800W	900W	1000W	1200W	1340W
Standard	4 Slot	XLA	XLB	XLC		XLD					
	6 Slot		XCA		XCB				XCC	XCD	XCE
Medical	4 Slot	XMA	XMB	XMC		XMD					
	6 Slot		XVA		XVB				XVC	XVD	XVE
Low Noise Standard	4 Slot	ХКА	XKB	XKC							
	6 Slot			XQA				XQB		XQC	
Low Noise Medical	4 Slot	XRA	XRB	XRC							
	6 Slot			XZA				XZB		XZC	
Ultra Quiet Standard	4 Slot	XTA	XTB								
	6 Slot		XBA	XBB			XBC				
Ultra Quiet Medical	4 Slot	XNA	XNB								
	6 Slot		XWA	XWB			XWC				
Hi-Temp	6 Slot		XHA	XHB							

### Xgen powerMods

High Efficiency Plug and Play DC output modules to provide a wide range of DC output voltages from 1.0V up to 58.0V.

MODEL	Vmin		Vnom	Vmax	Imax	Watts
	Vtrim	Vpot				
Xg1	1.0	1.5	2.5	3.6	50A	125W
Xg2	1.5	3.2	5.0	6.0	40A	200W
Xg3	4.0	6.0	12.0	15.0	20A	240W
Xg4	8.0	12.0	24.0	30.0	10A	240W
Xg5	8.0	24.0	48.0	58.0	6A	288W
